SKILLS

- HTML & CSS
- JavaScript
- TypeScript
- React(Next.js)
- PHP
- UI & UX
- AWS
- Git & GitHub

LANGUAGE

- Japanese

QUALIFICATIONS

- FE

PROFILE

I am a student of architecture at Nihon University, Faculty of Science and Technology, and have been studying since 2021. I became interested in programming in my second year and learnt the basics of HTML, CSS, Ruby and Ruby on Rails on Progate. I then went on to learn a wide range of skills on Udemy, including HTML, CSS, JavaScript, Node.js, Express, React, Next.js, TypeScript, Python, PHP, Docker and AWS. In addition, I learnt basic computer science (data structures and algorithms), SQL, software engineering, design patterns and operating systems at Recursion.

Currently, I am also working on the development of a performance diagnostic tool for laboratory animal facilities at the request of a professor in my laboratory.

WORK EXPERIENCE

Performance diagnostic tool for laboratory animal facilities

2024 -

Product Manager

- Handled comprehensive product design, development, testing, and security, among other responsibilities.
- Developed an application based on research papers accumulated by senior members of the laboratory.
